ACO SERIES

超静音

性能好

风力强劲

AIR PUMPS FOR AERATING AQUARIUMS, AQUA CULTURE & INDUSTRIAL USE.

FEATURES

- The product adopts electric magnetic motor and the air is produced by piston in the way of straight-line and reciprocal motion, and it has more reasonable structure.
- Non-oil lubrication and pure compressed air.
- Adopt SF1 new-type wearing-resistant material for the piston and cylinder, which is of low power consumption, large air output and high air pressure.
- The case is made of high-quality ZL102 aluminum alloy with streamline design, and heat-dissipation is more effective.
- Phosphorize disposition, regular coloring and adhesive strength.

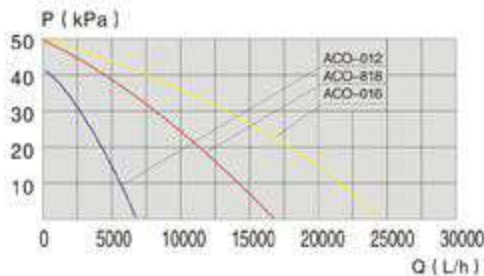

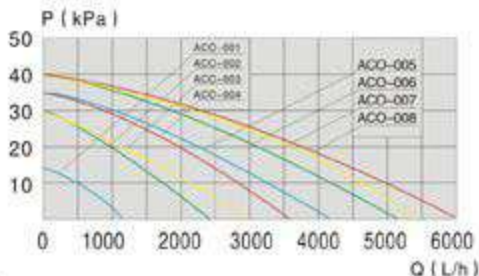

APPLICATION

- It's used for planting aquarium plant, aerating for seafood in hotels, restaurants, seafood booths, and feeding pool etc, it's also used for air supply to spare parts of food machine, medical instrument, belching lamp and new type paint, making and designing advertising LPG and LNG etc.

NOTE

- Place the machine above water level to protect water from flowing backwards, or it should be fit with a non-return valve.
